

**WALTON**  
**DE-ICE**

**Snow Shield**

This Walton De-Ice Snow Shield 4.5 meter Cover was delivered to Kansas City, KS. and installed onto a 4.5 meter Antenna and is now on it's 8th. year of service. The customer has decided to give the Snow Shield Cover a tune up and also have Walton add the Ice Quake pockets to the Snow Shield Cover so that the customer can add the Ice Quake De-icing System to that antenna. The tune up consist of a 3 to 5 hour wash and then replacing the feed horn support boot's Velcro loop where the feed horn braces penetrate through the Snow Shield Cover.

What other competitor's cover even lasts 7 years in the field to were it can go through a tune up and even be upgraded to add an active de-icing system to it?

What other competitor's cover can then go into service for another 7 years and do the same if not better job at shedding ice and snow then it did when it was brand new?

With the Walton De-Ice Snow Shield Cover, you do get what you pay for. Do it right the first time.
